How to create your files:

PDF X/1a is the preferred format for file submission.

Careful attention must be paid to the proper creation of PDF files to ensure that they will reproduce correctly. Choose "PDF X/1a" or "Press Quality" in your job options when creating high resolution PDF's. The original files that you are making the PDF from should also be high resolution. Make sure images are CMYK and 300 dpi resolution and all fonts used are loaded and embedded.

Ads should be created to correct ad size dimensions, including bleed.
